

Website Basics

Text Output: Used to output text to the Console

```
console.log(`Text Output Here`);
```

Alert: Used to Create an Alert Box

```
window.alert(`Alert Here`);
```

Comment: Used to make comments that don't affect code

```
//This is a comment
```

```
/*  
    This  
    Is  
    A  
    Comment  
*/
```

Add Text for HTML ID: Replace an ID with actual text using JavaScript

```
document.getElementById("ID Here").textContent = `Text`;
```
