

Variables

Declare: Declare a variable

```
let x;  
let y;
```

Number: Assign a number value to your declared variable

```
let x = 123;  
x = 123;  
  
console.log(`You are ${x} years old`);
```

String: Assign text to a variable

```
let name = "Name";  
  
console.log(`Your name is ${name}`);
```

Boolean: True or false variables

```
let afford = true  
  
console.log(`Your can afford it: ${afford}`);
```
