

Functions

Function: Section of reuseable code

```
function happyBirthday(){  
    console.log(`Happy Birthday to you!`);  
    console.log(`Happy Birthday to you!`);  
    console.log(`Happy Birthday to you!`);  
    console.log(`Happy Birthday to you!`);  
}
```

```
happyBirthday();
```

Parameters: Parts of a function that are not defined but stated when the function is executed

```
function happyBirthday(username, age){  
    console.log(`Happy Birthday to you!`);  
    console.log(`Happy Birthday to you!`);  
    console.log(`Happy Birthday dear ${username}!`);  
    console.log(`You ar ${age} years old!`);  
}
```

```
happyBirthday(Timmy, 9);
```

Return: Return the result of the function.

```
function add(x, y){  
    let result = x + y;  
    return result;  
}
```

```
let answer = add(2, 3);  
console.log(answer);
```
